DETAILED ACTION

This application is a 371 of PCT/JP04/17837 12/01/2004

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group 1, claim(s) 1-4, drawn to biological method of making compound of formula (II).

Group 2, claim(s) 5-10, drawn to method of crystallization of optically active tetrahydrothiophene-3-ol.

The inventions listed as Groups 1-2 do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature common to groups 1-2 is the compound of formula (II). However, this is not a contribution over prior art as this compound is shown in the teachings of Zhang et al. Journal of American Chemical Society, 1993, 115, 3318-3319.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Suggestions:

If Group 1 is elected,

To facilitate prosecution and avoid rejections under 35 USC § 112-2 (vague and indefinite) as well as 35 USC § 112-1 (scope of enablement) it is suggested that applicant amend the claim 1 such that the specific strains defined in claims 2 and 3 are incorporated into the base claim 1.

If Group 2 is elected,

To facilitate prosecution and avoid rejections under 35 USC § 112-2 (vague and indefinite) as well as 35 USC § 112-1 (scope of enablement) it is suggested that optical purity of the starting material (R or S, enantiomeric excess) and the optical purity of the product (R or S, enantiomeric excess) are included in the claims.
